

- Vehicle Information Capture: It captures essential vehicle information, including make, color, and model.
- NCIC Database Integration: The system integrates with the National Crime Information Center (NCIC) database to cross-reference license plate information and identify potential security risks.
- Alerting and Notification: When a license plate matches with NCIC data occurs, the system triggers alerts to local law enforcement, who alerts Public Safety for immediate action by campus security personnel. It also contributes to enhancing public safety by enforcing no-contact orders and preventing unauthorized individuals from accessing campus. The alerting and notification process ensures that campus security personnel can respond swiftly to incidents, maintaining a safe and secure environment for the entire campus community

The university conducts regular security audits to identify and address vulnerabilities in the LPR system.

## LIU POST CRIME STATISTICS

Crime	On Campus			Non-Campus Buildings			Public Property			Residence Hall *		
	2020	2021	2022	2020	2021	2022	2020	2021	2022	2020	2021	2022
